Subject: RE: Form submission from: Stationary Sources of Air Pollution Contact Us About Stationary Sources of Air Pollution form

Mr. Rickel

Thank you for your question concerning the "EnviroTherm TVC" Combustor.

We have not received a performance test from this company for consideration to posting to our Oil and Gas Page at <https://www.epa.gov/stationary-sources-air-pollution/performance-testing-combustion-control-devices-manufacturers>; therefore it is not currently listed.

That does not preclude the company from selling their device to sources for compliance with the new source performance standards for oil and gas ("NSPS OOOO or OOOOa) or the national emissions standards for hazardous air pollutants for oil and gas (MACT HH and HHH) ..

An owner or operator who purchases a device for compliance with the rule (and which is not listed on the site above) has to conduct their own performance test of the device to demonstrate compliance with the rule.

The requirements for the manufacturer test and the owner/operator test may be found at 60.5413 and 60.5413a.

Please let me know if you have any more questions.

Submitted values are:

Name: Tim Rickel

Email Address: TMRickel@gmail.com

Comments:

This company is saying their combustor meets OOOO. They are not listed on your site. Please confirm if their Combustor meets OOOO or if they are misleading.
